**Policy Questions for Council Consideration:**

Staff has identified two main policy issues with the draft agreement:

1. Does the Council wish to designate two recently purchased city owned properties as recommended?
2. Does the Council wish to re-designate two properties from "open space" to "city-owned"?

**Summary:**

- In accordance with the City Charter, property owned by the City needs to be designated as park, open space, or city owned.
- The City recently purchased two properties and staff is recommending that one be designated as a park and the other as city-owned
- Two properties previously designated as park or open space should not have been designated as such given the reasons outlined in the attached memorandum and should be re-designated as city-owned
